Water Tank

Water tank requires decent waterproofing system in order to prevent water pressure leakage, from both underground and inside the tank. We install a proper waterproofing system for any water tanks!

Terrace & Terrace Garden

On flat terrace surface the water cannot run off the structure quickly and causes leakage and severe dampness specially in the ceilings. We make sure terrace remains waterproof despite the roof plantation.

External Wall

External walls face direct brunt of rain and other changes in weather. The cracks on walls seeps rain water inside the house ruining the interior décor. Our offer right and cost effective waterproofing solution!

W.C & Bathroom

Wet areas such as toilets, washbasins, bathrooms, kitchens and balconies is critical on account of the constant use of water. We offer complete and cost-effective solutions in such water leakages!

OUR USP'S

100 % Success Ratio

Geographically can work at any place

Well equipped for basements, Parking slabs, Swimming pools and water tank waterproofing work

Technical cost effective and long term waterproofing solution

ABOUT SAARTH
